

ELECTRICAL TESTING, COMMISSIONING AND ENERGY MANAGEMENT SPECIALISTS

Through our core values of safety, sustainability, and teamwork, QED has completed over 700 successful projects for more than 100 customers throughout Western Canada.

Our impact on the environment is mitigated through the use of best practices in material handling. In addition, we support our customers by identifying and implementing energy and greenhouse gas (GHG) reduction projects.

Our commitment to a safe and healthy work place is put into practice every day by our team. Our success is demonstrated by an incredible safety record including zero Loss Time Incidents (LTIs) through our first five years of operation.

Our knowledgeable and experienced team consists of professional engineers, journeyman electricians, journeyman winders and certified technologists. We see success through effective communication and collaboration.

Electrical Testing, Commissioning and Energy Management Specialists

QED specializes in the testing and commissioning of medium voltage, high voltage and protection systems. We are uniquely positioned to provide a comprehensive suite of energy management services.
