

TRANSFORMER OIL PROCESSING

QED is proud to offer clients access to our unique Mobile Oil Treatment Processing Unit. Our highly skilled personnel can bring the unit to your facility, no matter how remote.

The unit is capable of processing 17,500 liters/hour of transformer oil. It is completely self contained with:

- 1,600 CFM external vacuum cart, with 10-micron blank off
- Onboard 24,000 liter engineered, double-walled tank, which meets ULC-S601 standard
- Onboard dual generation, with house loads and vacuum run off 100 kW generator for high fuel efficiency (24 hours/day) and heaters run off 250 kW generator (12 hours/day)
- Onboard dry-air system
- Complete oil containment berm for oil processor section to ensure no environmental impact

Electrical Testing, Commissioning and Energy Management Specialists

QED specializes in the testing and commissioning of medium voltage, high voltage and protection systems. We are uniquely positioned to provide a comprehensive suite of energy management services.
